

**Investigate:** How can you make a model of the water cycle?

**3–4** Tape the bag to a sunny window. **Predict** what will happen over the next 3 days. **Observe** the bag. Record what happens.

Time	Predictions	Observations
After 2 hours		
Day 2		
Day 3		

### Explain Your Results

1. Make a drawing in the box below. Show how the water in the ice cube ended up in the bottom of the bag. Show the water cycle in your bag. Use arrows. Use these words as labels: *melting, evaporation, and condensation.*
